

VAXOCR CONTAINERS

VaxOCR Containers is Vaxtor's OCR software solution for the automatic detection and recognition of container codes based on the international standard ISO 6346.

The OCR Engine for container code recognition is 100% proprietary and the data obtained can be sent to third party applications using the communication interface of VaxALPR.

VAXOCR CONTAINERS IS AVAILABLE ON TWO PLATFORMS:

EMBEDDED IN CAMERAS

PC PLATFORMS

Overview

- OCR engine fast, accurate and easy to use
- Recognition of both horizontal and vertical container ISO 6346 codes
- Works with live video or still images
- Runs on standard PCs or embedded cameras with ARTPEC-6/7 processors
- PC version compatible with major camera

Operating mode

- **Triggered:** Recognition is initiated by an external event
-
-
- PC platform:
 - > External device with I/O port
 - > HTTP POST
- **Free flow:** Recognition is carried out continuously

Results in real time

- Data provided:
 - > Container code, owner code, owner city, container dimensions etc.
 - > Control digit validation
 - > Position of the code in the original image
 - > Sub-image of the container code
 - > Extra information (Date, time, video source etc.)
- Reporting options:
 - > Open, specific and RAW format
 - > VAPIX / ONVIF protocol
 - > Genetec Security Centre
 - > XML or JSON object through HTTP POST
 - > Container code in ASCII format

Applications

- Airports and harbor logistics
- Container inventory and surveillance
- Border control

Performance

- PC Platform (1 physical core @4GHz per camera):
Up to 50Km/h
